

AviChlorhex-B

Chlorhexidine Base

High-Purity Solution for Superior Antimicrobial Protection.

AviChlorhex-B is an advanced, high-purity chlorhexidine base, designed to meet the rigorous demands of various industries. Recognized for its potent antimicrobial properties, AviChlorhex-B is essential in formulations that maintain sterile and secure environments. AviChlorhex-B provides reliable and effective protection against contamination from healthcare applications to industrial sanitation, making it a critical asset for professionals committed to upholding the highest hygiene standards.

The Avid Organics Advantage

- FSSC-22000, ISO-14000, and ISO-45000, SMETA accredited facility.
- Kosher, Halal, FSSAI, and FDA-certified food & feed products/ingredients.
- All operations powered by 100%
- Pledged to achieve zero actual carbon emissions by 2040.
- Strictly committed to zero animal testing.
- In-house R&D that delivers customized, eco-friendly solutions to meet evolving industry needs.
- State-of-the-Art infrastructure & facility.

AviChlorhex-B is manufactured precisely, ensuring it consistently meets stringent industry standards. Our product is available as a white or almost white powder, reflecting its purity and quality, and is optimized for use in various applications where superior antimicrobial efficacy is required.

Market Applications of AviChlorhex-B

1. Skin & Hand Disinfection

- A key ingredient in top-tier skin and hand disinfectants.

2. Healthcare Industry

- Used in antiseptic solutions for treating cuts and periodontal treatments.

3. Oral Health

- Used as an irrigation solution in root canal treatments.

4. Pharmaceutical Preservative

- A trusty addition in eye drops, ensuring longer shelf life and safety.

Technical Specifications

CAS Number: 55-56-1

Molecular Formula: $C_{22}H_{30}Cl_2N_{10}$

Molecular Weight: 505.46 g/mol

Parameter	AviChlorhex-B Specification
Appearance	White or almost white powder
Solubility in water	It dissolves in hot n-Butanol and Mineral acid; Very slightly soluble in Methanol; Practically insoluble in water
Identification	
A) IR	A) IR spectrum of the test sample should be concordant with that of Chlorhexidine working standard
B) Melting Range	B) Between 132°C -136°C
C) Color test	C) A deep red color produced
Loss on drying	Not More Than 1.0 % w/w
Sulphated Ash	Not More Than 0.1 % w/w
P-Chloroaniline	Not More Than 500 ppm
Assay	98 % to 102 % on dried basis
